

## BLOCKS 60-100 MM

They are obtained by sintering Of Rare Earths. This kind of magnets reaches the highest values of magnetic attraction; for this reason, they are recommended where is required a great power in small spaces. Another advantage is the maintenance of the magnetic charge, higher than in other types. It's recommended to respect the max operating temperatures indicated in [Physical Magnet Data Sheet](#).

**All measurements are in millimeters. Other sizes and shapes on request.**

**The strength of attraction is purely indicative and it could be different depending on the type of application and assembly.**

**The [magnetization](#) is axial. Other kind of magnetization on request.**

| CODE                | TYPE     | A   | B  | H   | STRENGTH KG |
