

MAGNETIC LIFTER WITH MANUAL CONTROL FX

Magnetic lifters are suitable for lifting bars, round plates, moulds, beams or other pieces of iron. Their use can simplify loading and unloading operations, thus reducing the execution time. The FX series products have a lever with 90° rotation; this makes the lifter even safer and easier to handle.

Code	Type	Max load (Kg)		Max load from	Dimensions	
		Plane	Circular		L	B
SL10.000003.FX150	FX150	150	Ø 50-200 mm 75 kg	8	161	64
