

## PN03 FOAM SELF ADHESIVE

Isotropic Plastroferrite - NOT ORIENTED BH max 0,5 - with Foam self-adhesive

PLASTOFLEX X5 magnets are made by a compound of synthetic rubber powder and Barium Ferrite. They are obtained by extrusion. The available sizes are: thickness from 1.2 to 3 mm/ width from 10 to 70 mm/length rolls. We can also provide custom-cut pieces by request. They are also available with [coloured pvc glossy](#) or coupled to various types of self-adhesive, both [plain](#) and [self adhesive](#) at high adhesion.

Magnetization : axial / 2 poles /more poles on the same side.

CODE	THICKNESS MM	WIDTH MM	LENGTH M
PN03.X50000.1210	1,2	10
