

## PN04 GLOSSY COLOURED PVC

Isotropic Plastroferrite - NOT ORIENTED BH max 0,5 - glossy coloured PVC

PLASTOFLEX X5 magnets are made by a compound of synthetic rubber powder and Barium Ferrite. They are obtained by extrusion. The available sizes are: thickness from 1.2 to 3 mm/ width from 10 to 70 mm/length rolls. We can also provide custom-cut pieces by request. They are also available with [coloured pvc glossy](#) or coupled to various types of self-adhesive, both [self-adhesive](#) and [white foam self adhesive](#) at high adhesion.

Magnetization : axial / 2 poles /more poles on the same side.

CODE	THICKNESS MM	WIDTH MM	LENGTH M
PN04.X50000.1215	1,2	15	
PN04.X50000.1220	1,2	20	
PN04.X50000.1225	1,2	25	
PN04.X50000.1230	1,2	30	
PN04.X50000.1235	1,2	35	
PN04.X50000.2020	2	20	

**All the measurements are in millimeters. Other sizes and shapes on request.**
